DETAILED ACTION

Affidavit under 37 CFR § 1.132

The Declaration under 37 CFR 1.132 filed 1 October 2003 is sufficient to overcome the rejection of Claim 1 based upon 35 USC 102 using Hirshbrunner (US 4,743,288).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. §102(b) as being anticipated by Jeo (MadSci Network: Agricultural Sciences).

As to Claim 1, Jeo discloses a synthetic hydrophobic sand formulation (see Jeo in that humic substances, humic, is added to soil that is naturally low in organics, like a sandy soil) exhibiting a penetration period of at least 9 seconds for a drop of 2 molar ethanol under a minimal ethanol drop test (inherent in sandy soils in that sandy soils have high infiltration rates - see Soil Type for support) wherein at least a portion of the sand formulation is treated with humic acid (see Jeo).

Response to Arguments

Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.

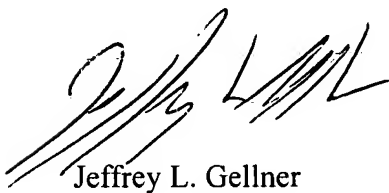

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ecological Turf Management for Sand Based Play Fields discloses in the art adding humic acid to sandy soils. Petrea et al. ('548 B2) and Petrea et al. ('153 B1) disclose other patents by the instant Applicant. Petrea et al. ('261 A1) discloses an application by the instant Applicant. Petrea et al. (259 A1) discloses the instant Application's pre-grant publication.
